NBI 26-01: MCPS Regional Program Model Position

MCEA officially opposes the current MCPS Regional Program Model as proposed by the Superintendent. (BOE Presentation Slides 7/24/25). The MCEA President will advocate the Association's opposition to the Board of Education and the Superintendent. While MCEA supports the goals of increasing access and equity to enriched instruction, the current proposal does not meet that goal. MCEA calls for an immediate suspension of the current process until all stakeholders are actively involved in the development of a new model.

MCEA will advocate for the creation of a new plan that:

- Includes MCEA input in the design
- Limits the financial impact on other system initiatives
- Limits the impact on other system initiatives that are successful and should serve as models for expansion
- Provides a model that does not limit educational access to impacted communities
